

## ImaginAb Selected as a Red Herring Top 100 North America Winner

Zurich (Switzerland), May 19, 2014 – ImaginAb has made it into the Red Herring Top 100 tech companies in North America for 2014. The announcement was made at an award ceremony at the Intercontinental Hotel in Monterey CA on the 16th of May.

ImaginAb's co-founder and CEO Chris Behrenbruch commented, "It is a terrific honor for ImaginAb to receive this recognition and to be counted among the best and brightest technology companies in America. It's especially exciting for us because on the one hand, we're a biotech company, but on the other hand the output of our science and technology is a digital image that directly integrates with the medical IT space. It's great to see the tech community so strongly supportive of innovation in healthcare."

ImaginAb was founded in October 2007 by Dr(s) Anna Wu, Rob Reiter and Chris Behrenbruch and was launched on the basis of innovative antibody engineering technology developed at the City of Hope and the University of California, Los Angeles. Since then it has grown to almost 40 employees across three sites – Los Angeles (Inglewood), Singapore and Tokyo. The company has raised a total of \$33.5m in venture financing alongside valued translational research funds from the National Cancer Institute (NCI). ImaginAb's pipeline of novel PET imaging agents for cancer and autoimmune diseases have the potential to transform both clinical care and drug development. ImaginAb's lead product for prostate cancer is currently in Phase II development.

### **About ImaginAb**

ImaginAb is redefining therapeutic management by harnessing the power of antibody technology for in vivo imaging. The company's proprietary antibody fragment platform yields actionable molecular information to guide treatment decisions in cancer and immunology. ImaginAb also collaborates with select biopharmaceutical partners to design imaging agents as companion diagnostics for therapeutic antibodies. ImaginAb's technology is positioned to deliver on the promise of precision medicine by improving patient outcomes and reducing the cost of healthcare.

### **About Red Herring**

Red Herring is a global media company which unites the world's best high technology innovators, venture investors and business decision makers in a variety of forums: a leading innovation magazine, an online daily technology news service, technology newsletters and major events for technology leaders around the globe. Red Herring provides an insider's access to the global innovation economy, featuring unparalleled insights on the emerging technologies driving the economy.
